

Refund Policy

This policy applies to purchases made from the fictional company's SaaS product.

Refund request window

Refund requests must be made within 30 calendar days of purchase.

Refunds are not automatically approved. Each request must be reviewed by support before a decision is made.

Usage boundary

Refunds may be considered only if the customer has not materially used the service. Material use may include sustained product access, repeated feature usage, completed exports, active team collaboration, or other activity showing that the service was meaningfully used after purchase.

If usage is unclear, support will review the account history before making a decision.

Requests requiring human support

Requests involving fraud, legal claims, safety, regulatory issues, data loss, discrimination, or similar sensitive concerns must be escalated to human support before any response is given.

Enterprise contracts

Enterprise customers may have separate contract terms. If a refund request relates to an enterprise contract, the customer should contact support for review under the applicable agreement.

How to request a review

Customers should contact support with their purchase date, account email, and a short explanation of the request. The support team will review the request and respond with the next step.

This document contains policy information, but it is not yet an operating knowledge base.
